- Results are displayed with **pagination** for easier navigation.

Feature	Method	Parameters (JSON)	Postman API URL
Leave Count Pending	GET	-----	/api/admin/leaves/count/pending
Leave Count Approved	GET	-----	/api/admin/leaves/count/approved
Leave Count Rejected	GET	-----	/api/admin/leaves/count/rejected
Leave Count Today	GET	-----	/api/admin/leaves/count/today

API table for Leave Management page

Feature	Method	Parameters (JSON)	Postman API URL
Get All Leaves	GET	—————	http://localhost:5000/api/leaves
Get Leave by ID	GET	—————	http://localhost:5000/api/leaves/ 01
Filter by Status	GET	Query param: status-Approved / Pending / Rejected Query param: Leave Type- Full Day / Half Day / Hour Permission / Extended Leave / Compulsory Leave	http://localhost:5000/api/leaves? status=Approved
Search by Employee	GET	Query param:search-employeeName	http://localhost:5000/api/leaves? search=Ravi

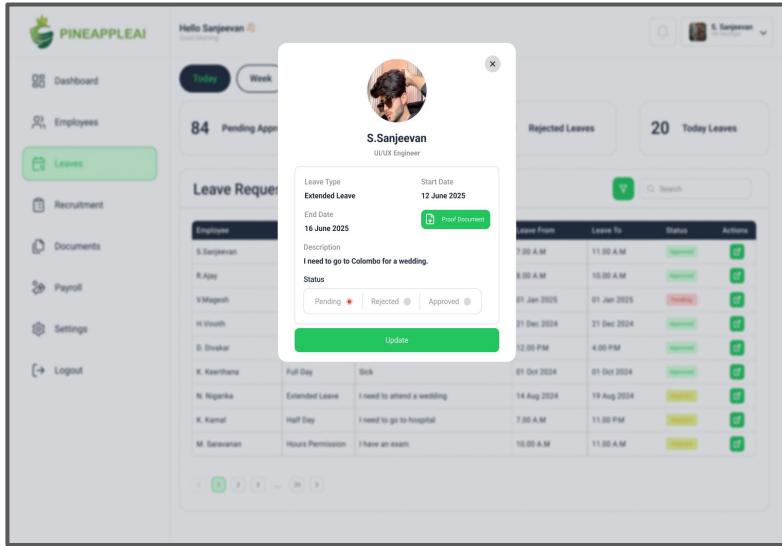

Leave Management - Hour Permission

Feature	Method	Parameters (JSON)	Postman API URL
Get Employee Profile	GET	-----	/api/employees/EMP001/profile-pic
Get Employee Position	GET	-----	/api/employees/EMP001/position
Get Leave Details by ID	GET	-----	/api/admin/leaves/01
Update Leave Status	PUT	{"status": "Approved"}	/api/admin/leaves/001/status
Download/View Document	GET		/api/admin/leaves/01/proof

- The admin can view the details of an employee's **hour-based permission request**.
- The admin can update the leave status to either **Approved** or **Rejected**.
- The admin can also download the submitted proof in **PDF format**.

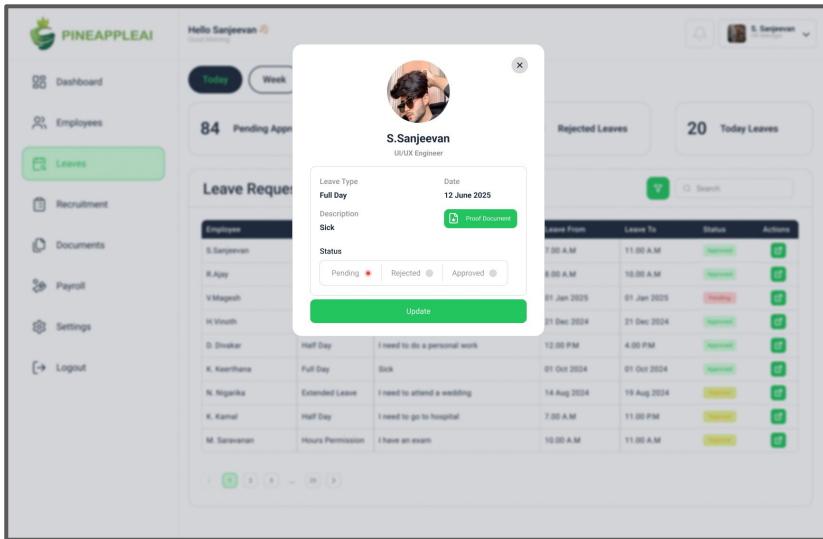

Leave Management - Extended Leave

Feature	Method	Parameters (JSON)	Postman API URL
Get Employee Profile	GET	-----	/api/employees/EMP001/profile-pic
Get Leave Details by ID	GET	-----	/api/admin/leaves/01
Update Leave Status	PUT	{"status": "Approved"}	/api/admin/leaves/001/status
Download/View Document	GET		/api/admin/leaves/01/proof

- The admin can view the details of an employee's **extended leave request**.
- The admin can update the leave status to **Approved** or **Rejected**.
- The admin can download the submitted proof in **PDF format**.

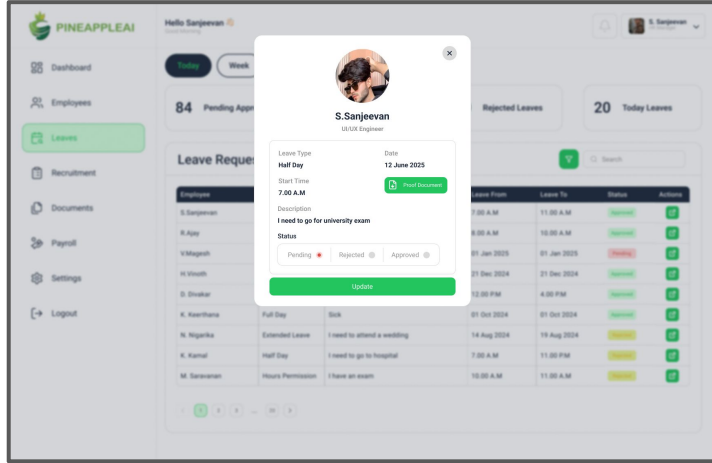

Leave Management - Full Day Leave

Feature	Method	Parameters (JSON)	Postman API URL
Get Employee Profile	GET	-----	/api/employees/EMP001/profile-pic
Get Leave Details by ID	GET	-----	/api/admin/leaves/01
Update Leave Status	PUT	{"status": "Approved"}	/api/admin/leaves/001/status
Download/View Document	GET		/api/admin/leaves/01/proof

- The admin can view the details of an employee's **full-day leave request**.
- The admin can update the leave status to **Approved** or **Rejected**.
- The admin can download the submitted proof in **PDF format**.

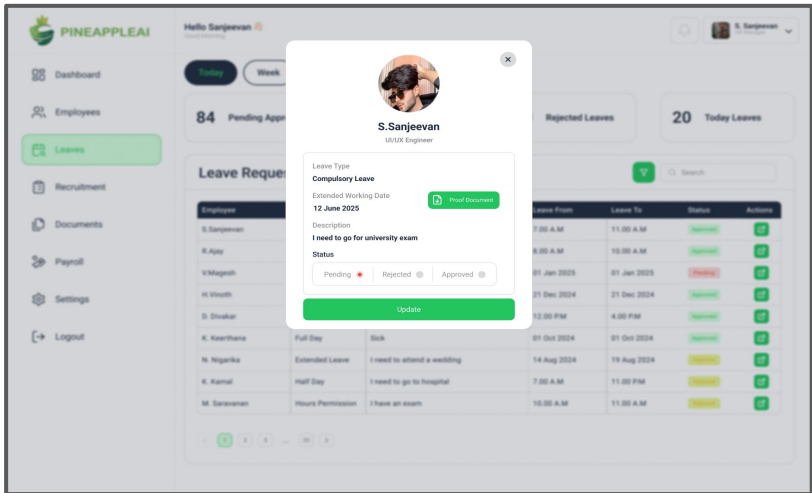

Leave Management - Half Day Leave

Feature	Method	Parameters (JSON)	Postman API URL
Get Employee Profile	GET	-----	/api/employees/EMP001/profile-pic
Get Leave Details by ID	GET	-----	/api/admin/leaves/01
Update Leave Status	PUT	{"status": "Approved"}	/api/admin/leaves/001/status
Download/View Document	GET		/api/admin/leaves/01/proof

- The admin can view the details of an employee's **half-day leave request**.
- The admin can update the leave status to **Approved** or **Rejected**.
- The admin can download the submitted proof in **PDF format**.

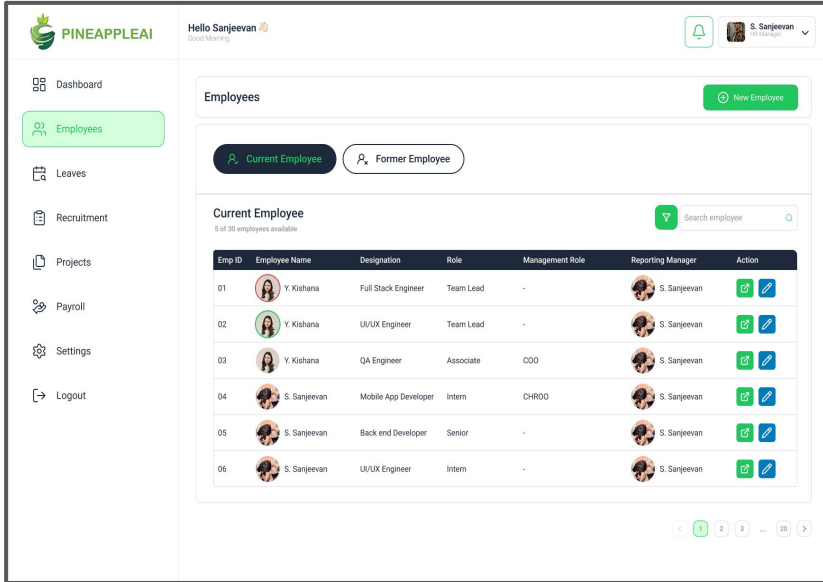

Leave Management - Compulsory Day Leave

Feature	Method	Parameters (JSON)	Postman API URL
Get Employee Profile	GET	-----	/api/employees/EMP001/profile-pic
Get Leave Details by ID	GET	-----	/api/admin/leaves/01
Update Leave Status	PUT	{"status": "Approved"}	/api/admin/leaves/001/status
Download/View Document	GET		/api/admin/leaves/01/proof

- The admin can view the details of an employee's **compulsory leave request**.
- The admin can update the leave status to **Approved** or **Rejected**.
- The admin can download the submitted proof in **PDF format**.

Employee Management - Current Employee

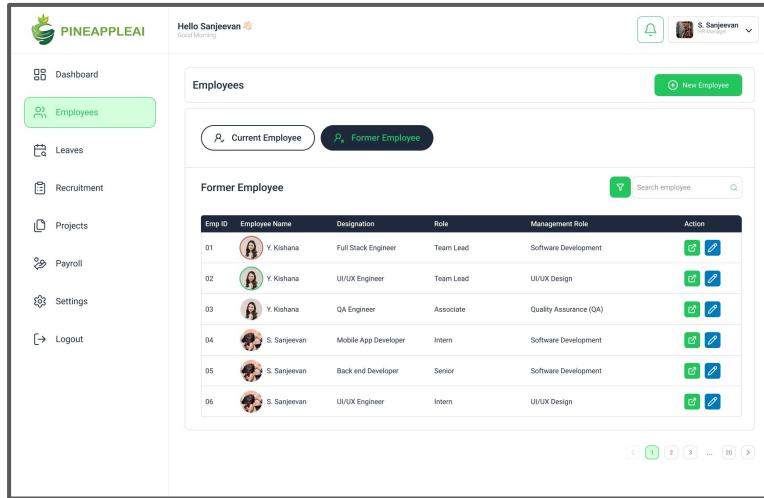

Feature	Method	Parameters (JSON)	Postman API URL
Get All Current Employee Details	GET	-----	/api/employees/current
Get Employee By ID	GET	-----	/api/employees/01
Create New Employee	POST		/api/employees
Update Employee	PATCH		/api/employees/01

- The admin can view the details of an current employee's details by clicking expand icon
- The admin can update the employee details by clicking edit icon.

API table for Employee Management - Current Employee page

Feature	Method	Parameters (JSON)	Postman API URL
Delete Employee	DELETE	-----	/api/employees/01
Get Profile Image	GET	-----	/api/employees/01/profile-pic
Search Employees	GET	?name = , ? designation = , ? role =	/api/employees/search? name=Sanjeevan
Filter	GET	Query param: Designation / Role / Dep	

Employee Management - Former Employee

Feature	Method	Parameters (JSON)	Postman API URL
Get All Former Employee Details	GET	_____	/api/employees/former
Get Employee By ID	GET	_____	/api/employees/01
Create New Employee	POST		/api/employees
Update Employee	PATCH		/api/employees/01

- The admin can view the details of an former employee's details by clicking expand icon
- The admin can update the employee details by clicking edit icon.

API table for Employee Management - Former Employee page

Feature	Method	Parameters (JSON)	Postman API URL
Delete Employee	DELETE	-----	/api/employees/01
Get Profile Image	GET	-----	/api/employees/01/profile-pic
Search Employees	GET	?name = , ? designation = , ? role =	/api/employees/search? name=Sanjeevan
Filter	GET	Query param: Designation / Role / Dep	

New Employee - Step 1

The screenshot shows the 'New Employee' form in the PINEAPPLEAI system. The form is titled 'New Employee' and has a progress indicator. It is divided into two main sections: 'Personal Information' and 'User Credentials'. The 'Personal Information' section includes fields for Name, Gender, Date of Birth, Phone number, Address, and Email, along with an 'Upload Picture' button. The 'User Credentials' section includes fields for Employee ID, Password, and Email, along with 'Cancel' and 'Create' buttons. A sidebar on the left contains navigation links for Dashboard, Employees, Leaves, Recruitment, Projects, Payroll, Settings, and Logout. The top of the form shows a user profile for 'S. Sanjevan' and a progress indicator.

Feature	Method	Parameters (JSON)	Postman API URL
Upload Profile Picture	POST	FormData { image: File }	http://localhost:5000/api/employees/uplo ad-pic
Create New Employee	POST	<pre>{ "name": "sajee", "gender": "Male", "DOB": "1997-01-01", "phone": "0762587935", "address": "Jaffna", "email": "sample@gmail.com", "empld": "52", "password": "tyexdkws", "rolemail": "example.pineappleai@gmail.com"} </pre>	http://localhost:5000/api/employees

- The admin need to enter the personal information of the new employee
